

THE INTERNATIONAL INSTITUTE OF MIGRATION AND DEVELOPMENT (IIMAD)

ORGANIZES AN ONLINE COURSE ON

Mastering Kobo Toolbox: Build, Collect & Manage Data

Kobo Toolbox is a powerful, open-source platform that has transformed how organizations and researchers collect data in the field. This hands-on 4-hour training (spread over 4 days) is designed to introduce participants to the complete Kobo Toolbox ecosystem—from creating digital forms to collecting and managing high-quality data using mobile devices.

Ideal for researchers, NGO professionals, and students, the course covers everything from basic question design to advanced features like skip logic, validation, and XLS Form integration. Participants will also gain practical experience using the Kobo Collect mobile app, including real-time data collection and troubleshooting field challenges.

The training concludes with an in-depth session on data management, exporting datasets in multiple formats (Excel, SPSS, GeoJSON), and identifying errors in collected data. No prior coding or technical experience is needed. By the end of the workshop, you'll have the skills and confidence to design, deploy, and manage professional-grade digital surveys.

COURSE SYLLABUS/CURRICULAM

1. "Foundations of Digital Data Collection: Getting Started with Kobo Toolbox"
2. "Design Smart: Building and Customizing Forms with Kobo"
3. "XLSForms and Kobo Collect: Advanced Tools for Field Data Collection"
4. "From Field to File: Data Management, Cleaning, and Export in Kobo"

RESOURCE PERSONS

Ajay P Karuvally,
Research Fellow, IIMAD

Rohit I
Research Fellow, IIMAD

TIMINGS: 7:00 p.m.- 8:00 p.m.

DATES: July 1, 2, 3, & 4

COURSE FEE: Rs. 2000

Note: Scholarships are available for students with financial constraints. Please contact us.
